

Manzen

from Tissue Typing Systems

Manzen is the only UK sourced and based Histocompatibility & Immunogenetics LIMS solution and is developed and supported by Tissue Typing Systems (UK) Ltd who were established in 2006 to provide solutions to the UK H & I community. The Manzen solution is the sole focus of the company who are proud to supply some of the busiest and most prestigious laboratories in the UK.

Key Features of Manzen include:-

- Track and manage People, Test Requests and Test Result data
- Flexible searching for People, Test Requests and Samples
- Store subject specific data for HSC and Solid Organ patients, family members, donors and prospective donors
- Create and maintain links to other Person records
- Create a hierarchy of Samples and their products with detailed information about each sample
- Identify all Tests undertaken against a single sample
- Create Test Requests and add the tests to be performed against the sample
- Combine different types of test, including HLA Typing, HLA Antibody Screening, Crossmatching, B27, B57, CD Surface Antigens, HFE & Chimerism within a single Test Request
- Automatic Importing of Luminex™ SSO Typing Data & HLA Antibody Results
- Automatic Importing of Typing Results from NGS Engine™, SureTyper™ & QType™.
- Identify Antibody Results that require review by Senior Staff
- Monitor Donor Specific Antibodies between patient and donor
- Testing Summary for a single screen view of all testing to have been recorded against an individual
- Create a Definitive HLA Type from across multiple HLA Typing Test Results
- Create a Definitive antibody profile, with automatic ordering of HLA specificities
- Import orders from HL7 messages
- Have Antibody Tests suggested, based on previous results and user defined requirements
- Manage ODT electronic data submission for renal patients
- Manage Stem Cell Donor Search & VT Requests
- Record Transplant Information for both Solid Organ & Stem Cell Transplants
- Laboratory Diary to organise work schedules and create batch files for testing systems
- Flexible reporting
- Standard queries to identify outstanding tasks
- Extensive Security and Audit Features
- User maintainable Reference Data
- Compare data held at ODT with data held in Manzen to identify discrepancies
- ... and much more
